

Web Studio™

Control your communications.

Hire temporary intelligent transport systems (ITS) products and solutions from MVIS and benefit from Web Studio™ technology. This sophisticated technology saves travel time and costs by enabling the instant communication of traffic information from any Wi-Fi enabled Apple device including laptops, iPhones and iPads. Users can view a map of their signs and zoom in, observe and adjust any number of signs in line with any developments on the ground.

The Web Studio™ system supplied by MVIS is ideal for organisations that hire multiple signs including police forces, event managers, local authorities and traffic agencies.

Key Features

- Leading edge remote technology
- SMS and email notifications of maintenance issues
- Radar monitoring functionality
